

Ph.D Position with the McLaren Lab at University of Texas, El Paso
Department of Biological Sciences

We are interested in a PhD student interested in the mechanisms affecting nutrient availability across dryland ecosystems. Qualified candidates should have a B.S. or M.S. in Ecology, Biology, Environmental Science or related field, and show a strong interest in plant ecology, ecosystem ecology or biogeochemistry. Ideal candidates will have some previous research experience in field ecology, a strong work ethic, be able to work independently and with a field crew, and availability to begin in summer or fall 2022. Funding will be provided through a combination of RAs and TAs.

More information about my lab at UT El Paso is available at www.jenniemclaren.com

More information about the Department of Biological Sciences and its graduate programs can be found at <http://science.utep.edu/biology/> and <http://science.utep.edu/eeb/>.

Applications for graduate school are due Feb 1, but late applications will be considered for the right candidate. Interested students should send a c.v. and short statement of research interests to Jennie McLaren at jrmclaren@utep.edu prior to applying.
